OR, A

D I A R Y

{ ASTRONOMICAL,
ASTROLOGICAL,
METEOROLOGICAL, }

For the Year of our Lord, 1720.

BEING

The Bissextile, or Leap-Year.

Containing,

The Planets Motions and Aspects, Eclipses, Sun Rising and Setting, Day-break, Twilight, Planetary-Hour by Day and Night, &c. With a general Astrological Judgment on the Sun's Entrance into the four Cardinal Points ; and other useful things.

By JOB GADBURY,

Student in Physick and Astrology.

Multi Multa sciunt, sed Nemo Omnia.

L O N D O N :

Printed by T.W. for the Company of STATIONERS,
1720.

James Oakes

The Vulgar or Common Notes with the Moveable Feasts in the Julian and Gregorian Calendar, for the Year 1720.

Julian, or English Account.

Gregorian, or Foreign Account.

	11	Golden Number.	11
	1	The Epact.	20
	21	Cycle of the Sun.	21
	13	Roman Indiction.	13
	C 5	Dominical Letter.	G F
February	28	Shrove-Sunday.	February 11
March	27	Midlent-Sunday.	March 10
April	17	Easter-day.	March 31
May	26	Ascension-day.	May 9
June	5	Whit-Sunday.	May 19
June	12	Trinity-Sunday.	May 26
November	27	Advent-Sunday.	December 1

Note, The Days here for the *Gregorian* Account are the Days of the Month in their Calendar, which precedes ours 11 Days; whereby our 1st day of the Month is their 12th, and our last day of the Month their 11th.

The Times when Marriages are prohibited.

From *Advent-Sunday* till *January 12*.

From *Septuagesima-Sunday* till 8 days after *Easter*.

From *Rogation-Sunday* till *Trinity-Sunday*.

Some of these being Times of solemn Fasting and Abstinence, and some holy and joyful Festivals; both fit to be spent in such sacred Exercises, without other Avocations.

Note, The Computation of the Year of our Lord in the Church of *England*, beginneth the 25th day of *March*.

Certain Days prefix'd for all Sheriffs, Bayliffs of
 Liberties, and other Accomptants, to come to their re-
 spective Accompts in the Exchequer.

12	Edgar	959	16	36	Edward IV.	1460	22
13	Edward II.	975	2	37	Edward V.	1483	0
14	Etheldred II.	978	38	38	Richard III.	1483	2
15	Edmond II.	1016	1	Families United.			
Danish Line.				39	Henry VII.	1485	24
16	Canutus I.	1017	18	40	Henry VIII.	1509	38
17	Harold I.	1025	5	41	Edward VI.	1547	6
18	Canutus II.	1040	2	42	Q. Mary I.	1553	5
19	Edward Confess.	1042	24	43	Q. Elizabeth	1558	44
20	Harold II.	1066	1	Kingdoms United.			
Norman Line.				44	James I.	1603	22
21	William I.	1066	25	45	Charles I.	1625	23
22	William II.	1087	13	46	Charles II.	1648	36
23	Henry I.	1100	35	47	James II.	1684	4
24	Stephen	1125	19	48	Q. Mary II.	1688	6
Baron Line Restor'd.				49	William III.	1688	13
25	Henry II.	1154	35	50	Q. Anne	1701	12
26	Richard I.	1189	9	51	GEORGE	1714	
27	King John	1199	19	Whom God preserve.			

Kings are by God appointed for to sway
The Sword, and make Rebellious Men obey.
Those who oppose a Just and Gracious Prince,
Act more like Rebels, than like Men of Sense.
Long live King **GEORGE**, and may he ever be
A Terror to his Kingdoms Enemy.

The Glorious Planet *Venus* is a Morning Star, and may be seen adorning the East with her presence before the Sun rise, all this Winter Quarter, if Clouds interpose not.

This Month, whether we look upon the season of the Year of the Configurations of

Days 8 hor. 24 min. long increased 50 minutes.

the Planets, seems to be a time of Consultation rather than Action. *Jupiter* is no sooner Retrograde in *Libra* but he meets with a Time of the Sun. What can be a greater Happiness to true Protestants, than to have their Religion and Liberties protected and defended against the Insults of a discontented Tribe.

February, 1720.

First Quarter, the 5 day, 52 min. past 10 morning.
Full Moon, the 12 day, at 11 at night.
Last Quarter, the 19 day, 44 min. past 4 afternoon:
New Moon, the 27 day, 46 min. past 1 morning.

Lunar Aspects.

Last Month we have a Quartile of *Mars* and *Mercury*, and a Quartile of *Jupiter* & *Venus*, all in Cardinal Signs; and this Month the same Aspect of

The 8th day is 10 hou. long expressed a hou. 16 min.

the Sun and Saturn, of *Mars* and *Mercury*, and of Saturn and *Mercury*, whilst *Jupiter* is saluted with the friendly Trine of *Venus* and *Mercury*. People are inclin'd to Debates if not to Action, which (whatsoever be the Design of Saturn who is now stationary, and going Retrograde in *Scorpio*) or whatsoever be the Effects of those Consultations abroad, Truth and Justice, Religion and Piety is encouraged at home.

March hath XXXI Days.

On *March* the 8th you have *Perpetua* : She is reported to have been a zealous Christian in *Mauritania*, and for denying to sacrifice to Idols, was on that day devour'd by Lyons
Anno 210.

The 1st of this Month Her Royal Highness the Princess of Wales was born.

The 5th Day is 11 h. 40 m. increased 4 hou. 6 min.

The 9th day of this Month the Sun enters the Equinoctial Sign Aries, making the Days and Nights of equal length every where, except under the Poles, where the Sun at this time glides only round in the Horizon.

On the 10th of this Month we have an Opposition of the Sun and Jupiter, the Sun just entered the Equinoctial Sign Aries, and Jupiter out of all essential Dignities, which seems apparently to touch some of the Sacred Order. Let them, and all true English Subjects, take care to avoid incurring the Displeasure of a Prince who is aiming at the Interest of Religion, and the good of his Subjects.

April, 1726.

First Quarter, the 4 day, 46 min. past 8 at night.
Full Moon, the 11 day, 38 min. past 5 afternoon.
Last Quarter, the 18 day, half an hour past 10 morning.
New Moon, the 26 day, 34 min. past 10 morning.

Lunar Aspects.

Observations.

1. Day 16 hour. 6 minutes.
Eclips'd 22 minutes.

The variety of Aspects this Month seem to discover to us some more than ordinary business upon the anvil, especially in those Countries and Kingdoms under *Leo* and *Scorpio*.

13. Sun rises N. E. by E. and sets N. W. by W. and is East 9 min. after 7, and West 51 min. after 4.

pio. What is there yet more work cut out for *Italy* and *Sicily*? *Saturn* is in *Scorpio*, the House of *Mars*, who at the same time afflicts him with his Quartile from the Regal Sign *Leo*. This seems to affect *Norway*, &c. but time must discover the Event.

August hath XXXI Days.

On the 12th of this Month you have *Clar^e*, Virgin: She descended from an eminent Family in *Italy*; she instituted the College of Virgins, and the Order of the poor *Clares*; she dy'd *Aug. 11. 1252*, aged 70 years, and was buried on the 12th day, upon which she is mentioned in the Kalendar.

1. Day is 10 h. 48 m. long.
 decreases 5 hou. 42 min.

This Month is attended
 with no less than five Conjun-

Great Tides about this time.
 ctions of the Heavenly Bodies,
 which intimates this Month
 to be design'd more for Con-
 sultation than Action, in places
 under *Libra* and *Scorpio*, un-
 der which are *Germany*, *Nor-*
way, &c. which seem to be
 concern'd in the Debates and
 Affairs now upon the wheel.

On the 20th of this Month,
 1714, His Sacred Majesty King
 George was happily Crown'd
 at Westminster.

On the 30. his Royal High-
 ness the Prince of Wales was
 born.

November hath XXX Days.

On the 25th is placed *Catherine of Alexandria*: She was very zealous Professor of the Christian Faith, and boldly withstood the Emperor *Maxentius*, when he courted her to sacrifice to Idols; for which herself became a Sacrifice, being beheaded on this Day. *Anno 310.*

1. Day is 8 hou 52 min. long,
 decreas'd 7 hou. 34 min.

This Month the flow pac'd
 Saturn, after above 2 Year
 Transit, leaves the Warry

9. Sun rises S. E. by E. 8
 sets S. W. by W.

Scorpion, and enters the Coe-
 lestial Sagittarius; a Sign of
 the fiery Trigon. What In-
 fluence this may have upon
 Spain, and other Places under
 that Sign, we must leave it
 to Time to determine: In
 the mean time all Things a-
 present seem easy and quiet
 at Home.

Let every Man his own
 Concernments mind,
 Whatere's abroad, at home
 he Peace shall find.

December hath XXXI Days.

On the 29th day you have *Thomas* of *Canterbury*: He was born in *London*, and was the Son of *Gilbert Becket*: He was an eminent proficient in Learning, and by that means attained the See of *Canterbury*; and on this day Anno 1171, and in the 53^d year of his Age he was slain by the multitude.

Compendious Chronology to the Year 1720.

		<i>Tears since.</i>
566	K. James I. dy'd March 27. and K. Charles began	95
401	K. Charles II. was born May 29.	90
389	A great Fight between the Turks and Persians, where	
290	in was slain 90000 Turks and 20000 Persians	85
288	The Long Parliament began November 3.	80
247	The Rebellion in Ireland broke out in a most bloody	
22	manner against English Protestants there, so that in	
17, 20	two Months space, the innocent Protestants (be-	
17	sides many great and grievous Torments, and de-	
17	stroying of their Estates) were murdered no less	
17	than two hundred thousand persons	79
17	King Charles I. martyr'd 30 of January	71
	King Charles II. Restoration 29 of May	60
	London Burnt, September 2, 3, 4, 5, 6 Days	54
17	King Charles II. dy'd, King James II. began Feb. 6.	35
16	Prince of Orange sail'd for England, November 1.	32
16	King James II. abdicated December 12.	32
16	King William and Queen Mary Crowned April 11.	31
rough	The Battle at the Boyne, July 1.	30
10	The great Earthquake in England, Sept. 8.	28
6	Whitehall destroy'd by Fire, January 4.	22
5	The Czar of Moscovy at London	22
5	Our Glorious Queen Anne Crowned April 23.	18
3	A. Bambo dy'd of his Wounds in the West-Indies, Nov. 4.	18
2	The last great Wind, November 26 and 27 Days,	17
1	Gibraltar taken, July 24.	16
1	The great Victory gain'd over the French and Bavarz	
1	ans by the Confederates at Hochstedt, August 2.	16
1	The Pretender attempted to invade Great Britain,	12
1	Prince George of Denmark dy'd October 8.	12
s Chur	St. Paul's in London finish'd November 16.	12
again	Dunkirk surrender'd to the English	8
1	Peace proclaim'd, May 5.	7
	Q. Anne dy'd August 1. and K. George proclaim'd,	6
72	Rebellion at Preston and Scotland	5
	The 1st Great Frost	5
	The surprizing Metcor, March 19.	1

Of the ECLIPSES this Year.

Within the Compass of this Year there will be only two Eclipses, and both of the *Sun*, but neither of them will be visible in our British Hemisphere.

The first will be on *Thursday* the 28th of *January*, about 10 in the Forenoon, but although the *Sun* is then above the Horizon, yet (by reason of the *Moon's* South Latitude, augmented by her Parallax of Latitude, which is also South to us that inhabit in these Northern Climates) the *Moon* will be depress'd below the *Sun's* Limb, and therefore can't cause an Eclipse at *London*, but in the more Southern Parts of the World it may be seen; it falls in 19 deg. of *Aquarius*.

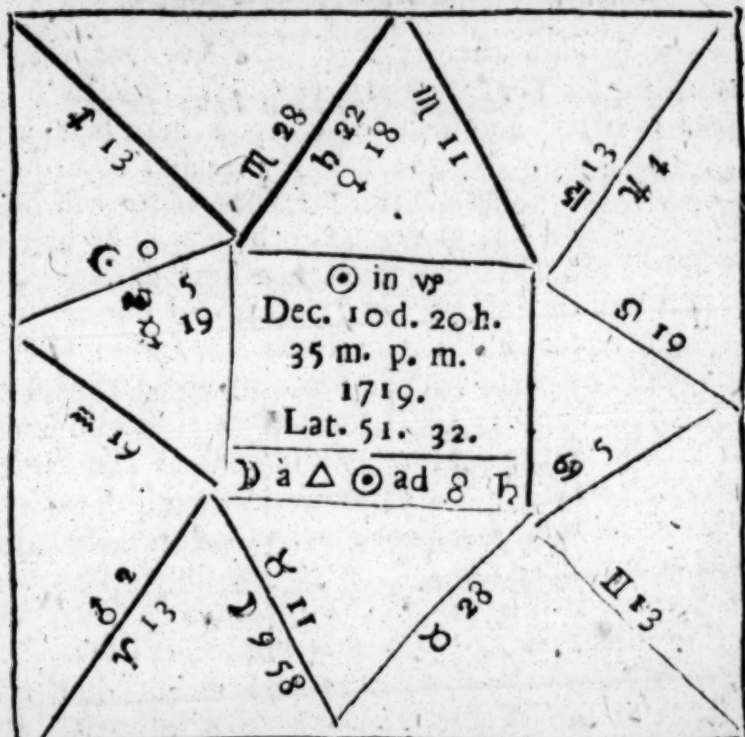

The Second will be on *Sunday* the 24th of *July*, a little before 4 in the Morning; it will be but a small Eclipse, and will be over before the *Sun* rise in *England*, but in the Northern Parts of the World, viz. *Moscow*, *Russia*, &c. it will be visible; it is in 12 deg. of *Leo*.

As to the Effects of these Eclipses, we shall leave it to those Kingdoms or Countries where they are visible, or those that are under the Signs in which they happen; hoping that our happy Nation and Government will have no Share of those Evils which are suppos'd to follow, as the Effects of Eclipses.

Of the Four Quarters of the Year, and first of the Winter.

THE Winter-Quarter begins when the *Sun* (to our appearance) enters into *Capricorn*, but more truly when the Earth enters into *Cancer*, making the shortest Days and longest Nights to all; in North Latitude it happens this Year according to Mr. *Sireer's Astronomia Carolina*, December the 10th, at 20 hours, 35 min. P. M. or (according to Vulgar Computation) December the 11th, 1719, 35 min. past 8 in the Morning, at which time the Face of Heaven appears as followeth.

GAD BURY. 1720.

It is very remarkable, that at this Ingress there is not one Planet retrograde nor stationary. *Saturn*, Lord of the Ascendant, is in the Mid Heaven, and *Venus* applying to him by Conjunction, and *Jupiter* is in the Eighth, whilst *Mars* in the Second in *Aries* is hastening to his Opposition, *Mercury* is in the Ascendant, and the *Moon* in ten degrees of *Taurus* in the Third House, going to a Trine of *Mercury*, and an Opposition of *Saturn*, but *Mars*, Lord of the Tenth, is in the Second in his own Territories, viz. *Aries*; and, which is worthy of Observation, *Saturn*, Lord of the Ascendant, is in the Tenth House: All this gives us Reason to hope for a right Understanding betwixt a Protestant Prince and a Loyal People, both which we happily enjoy in *England*, notwithstanding the vain Attempts that have been made against us: And if we have yet any of those amongst us, that under a Pretence of Religion and the Good of the Church, would overturn both; let such observe the Lord of the Ascendant in the Tenth, and the Lord of the Tenth in his own House in the Second, hastening to an Opposition of *Jupiter* in the Eighth; and compare the Success they may thence expect with what they have already had, and learn to be wise.

Mer.

Mercury, Lord of the Sixth in the Ascendant, in Sextile with *Venus* in the Tenth, gives us great reason to hope for a healthful Season, and such Weather as may be agreeable both to the Bodies of Men and the Fruits of the Earth, may be expected to succeed the Positions before mention'd.

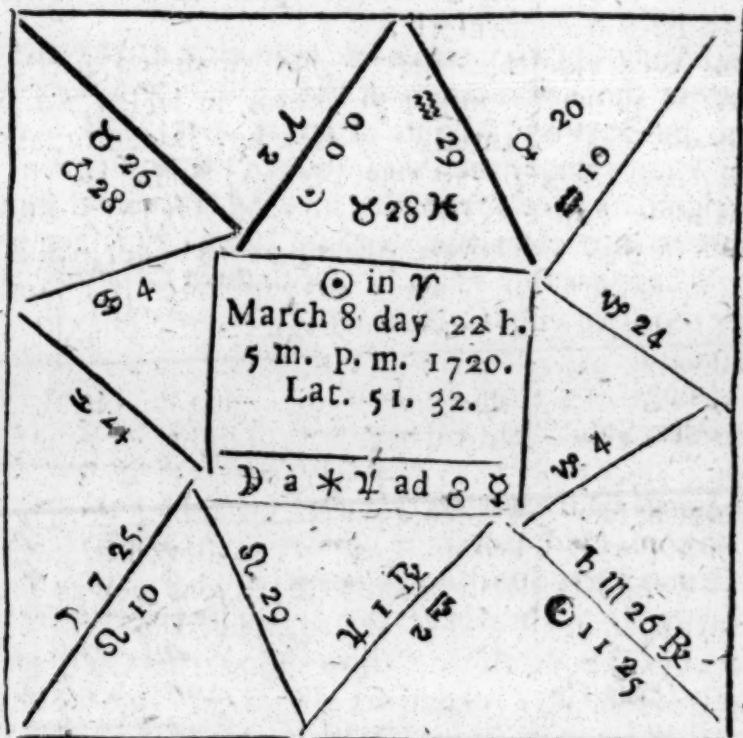

Of the Spring Quarter.

The Spring Quarter takes its beginning at the time the *Sun* enters the first Scruple of the Equinoctial Sign *Aries*, making the Days and Nights of equal length all over the World, except under the Poles, where the Equinoctial is in the Horizon, and the *Sun* in this, and the Autumnal Equinox only moves in the Horizon, without (sensibly) rising or falling. It happens this Year, by *Astronomia Carolina*, according to the following Calculation.

	s.	d.	m.	s.

G A D B U R Y. 1720.

By the foregoing Calculation the equal time of the *Sun's* entrance into *Aries* is the 8th of *March*, 21 hours 57 min. p. m. but allowing 8 minutes to be added for the Equation of natural Days, the true time is *March* the 8th, at 22 hours 5 min. p. m. or *March* the 9th, at 5 minutes past 10 in the morning, at which time the Face of Heaven is represented; as in the following Scheme.

In this Scheme we find the *Moon* Lady of the Ascendant, and Governess of the Year, going from a friendly Sextile with *Jupiter* to the Opposition of *Mercury*, and Quartile of *Uranus*. The *Moon* is general Significatrix of the common people; and more particularly so now, being Lady of the Ascendant: Which seems to intimate, that some of the discontented Vulgar will still be plotting and contriving mischief, and would be willing to have it manag'd, altho' cost them their Religion, Reputation, or any thing else that is dear to them, except their Money.

But if we look to the Tenth House, we find the *Sun* positioned therein; and he being general Significator of Regal Power,

Power and Government, and yet within the Rays of a friendly Trine with *Saturn*, Lord of the Tenth House, of the same signification, will let us see how much in vain those discontented Persons spend their Unsuccessful Endeavours, *Si Deus nobiscus, Quis contra nos*. And as the second House signifies Wealth or Substance, the *Moon* posited therein in the Dignities of the *Sun*, denotes a more prosperous and flourishing Trade amongst the Common People than hath been formerly.

It was observ'd, that there is an Opposition of the *Sun* and *Jupiter* about the middle of *March*, in which *Jupiter* is not only out of all Essential Dignities, but is debilitated by being Retrograde and (at this Ingress) under the Earth. Perhaps some Eminent Divine may be under the Frown of Fortune; and as 'tis common with Persons under Affliction, they seldom want Instruments to aggravate it: So it is here; for this Opposition is no sooner past, but the very Day following *Mercury* with full career comes into the House of *Mars*, and hurrying along, casts on his Malefick Opposition likewise, but where it will light, or what will be the effect, Time only must discover. However, *Venus* in the Ninth, in triple Reception with *Saturn*, Lord of the Ninth and Tenth, and *Mars* Lord of the Eleventh, gives us reason to hope that Religion and Charity, as well as Trade, will flourish amongst us. — *Mars* Lord of the Sixth, in the Twelfth, in Opposition to *Saturn* upon the Cusp of the Sixth, gives some Apprehensions of Danger from a Murrain or Mortality amongst great Cattle, and indeed among small Cattle too, when we consider the Position of *Saturn* upon the Cusp of the Sixth, Retrograde in *Scorpio*, a watery, cold moist Sign: Let those that deal in *Sheep* take care, as much as possible, to prevent their taking the Rott, especially in low Grounds, and in marshy places near the Sea-side, for *Saturn* in the Sixth, the Significator of small Cattle, and in *Scorpio*, a watery Sign, his Influence has a tendency that way.

Mars, Lord of the Eleventh, in the Twelfth, in Opposition to *Saturn* Lord of the Tenth, in the Sixth, is likely to turn the Friendship of some great Persons into Enmity and

G A D B U R Y. 1720.

Debate, breach of Contract, &c. but this mostly concerns Princes and Places under *Mercury*, *Scorpio*, and perhaps *Aquarius*, under which Signs the Astrologers have enumerated *Muscovy*, *Russia*, *Norway*, *Tartary*, the South part of *Sweden*, *Westphalia*, &c. Those that are willing to be Unfaithful will some time or other contrive to meet with an Opportunity; but for those that are real and sincere, the Planetary Influences cannot act so powerfully, as to carry People beyond or beside their Principles and Inclinations.

I cannot easily conclude this Quarter without taking notice, that *Saturn* is also Lord of the Eighth, and being so ill posited in the Sixth, in Opposition to *Mars*, from cadent Houses, he is likewise Retrograde, and void of all Essential Dignities, &c. Pray GOD preserve this Nation from Sickness and Mortality, tho' (according to the Rules of Astrology) it seems more directly to point at those Kingdoms and Countries under *Cancer*, *Scorpio*, and *Capricorn*; but GOD sends his Judgments where and when He pleases, and none can stay his Hand.

As to the Weather of this Quarter and the rest of the Year. I shall refer the Reader to the Calendar part, and shall not trouble my self to make any Repetitions, but conclude the Quarter with the Words of the Poet:

The Earth so hard; so parch'd with Cold, but now
Looks on us with a soft and silken Brow:
The Streets that were o'erspread with Dirt and Mire;
Put on (like Sunday's Dress) a clean Attire:
The Trees don't shroud their naked Heads with Snow,
In Robes of green they now themselves do show:
The Nightingale, that Prologue of the Spring,
Her sweeter Notes and Honey Tunes doth sing:
The Fields are painted o'er with Golden Flow'rs,
And Heav'n supplies their Wants with balmy Showres:
The Hills are gilded with the Morning Sun:
The Night grows short, the Day is soon begun:
Adieu, chill Winter, joyfully adieu;
The Spring's a Paradise, compar'd to you.

The

G A D B U R Y. 1720.

The *Summer Quarter* commences *June* the 10th, about 10 before Noon, when the *Sun* enters the *Tropick of Cancer*, and makes the longest Day to all on this side the *Equator*.

The *Autumn* or *Harvest Quarter* begins *September* 12th, about 1 in the Morning, when the *Sun* enters the first *Scruple* of *Libra*, and continues during the *Sun's* passage thro' *Libra*, *Scorpio*, and *Sagittarius*, and makes way for the approaching *Winter*.

*And thus the several Seasons go their Round,
And all Things with Vicissitudes abound :
Hence we may see, that every Year we spend
Doth bring us One Year nearer to our*
